TRADE FAIR FOR DUAL TECHNOLOGIES
OCTOBER, 14-15-16, 2025
PALAIS DES CONGRÈS - BORDEAUX / FRANCE

www.uavshow.com

ÉDITO

The challenge facing any trade show is above all to keep up with the times, while remaining true to the image of a market that can evolve very quickly, especially when it comes to a market as technological and innovative as that of drones!

And it's not just technology that's evolving fast in this market, but also usage. And one leads to the other.

The last two years have been marked by a shifting and intense geopolitical context, which has seen players move from civil to dual-use UAVs, and from dual-use UAVs to 100% defense UAVs. The funds allocated by private and institutional players have greatly contributed to the emergence of new disruptive technologies, but also more reactive ones for the mass production of vectors. As a result, the drone industry is speeding up and cutting corners to meet urgent operational needs and prepare for all eventualities. In addition to this overall situation, the drone industry is continuing to mature, as we already noted in 2023. Indeed, many of the players from previous editions have joined forces to create ever more robust companies. In concrete terms, this meant that the number of exhibitors remained stable, as we were still in the process of conquering new markets, but the exhibitors were bigger.

UAV SHOW 2025 responds to these changing circumstances by becoming the Dual Drone Show, and doesn't forget to look ahead, once again this year reserving a place for Urban Air Mobility with our partner Bordeaux Airport, for a day of flight demonstrations on the platform.

This will be an opportunity for all exhibitors to meet customers from the civil and defense sectors.

We look forward to seeing you at the Palais des Congrès and along the runways of Bordeaux Airport.

see you soon,

François Baffou
Bordeaux Technowest CEO

FROM OCTOBER 14 TO 16, 2025

- Be informed : sourcing, competitive intelligence,
- Exchange with professionals of the drone sector and autonomous systems,
- Share your experience on the show,
- Talk to armed forces operational staff and discover "combat proven" equipment,
- Discover the progress of autonomous systems on Urban Air Mobility developments.

EXHIBITORS

- Key accounts and major contractors,
- Owners and operators,
- Manufacturers,
- Laboratories, R&D centers and design and engineering offices,
- Startups,
- Test centers,
- Local authorities, institutions,
- Universities, schools and training centers,
- Services (insurance, innovation support, fundings, legal) and media,
- Competitiveness centers and clusters.

VISITORS

- European agencies,
- French and foreign government services: customs, ecology, agriculture, specialized services (maritime resources, CEREMA, IGN...),
- Local authorities,
- Industrial contractors,
- Managers of large real estate parks,
- Network managers (water, energy and heat, transport, etc.): public companies, delegated companies, etc.,
- Managers of major infrastructures: airports, ports, etc.,
- Innovation specialists and influencers: media, agencies and clusters, etc.,
- Foreign companies and foreign investors looking for French partners in the sector,
- Industrials and leading operators,
- French and foreign defense agencies,
- Defense innovation agencies,
- French and foreign staffs,
- Military test centers,
- Conventional and special military units (Air, Land and Sea),
- Civil security services (Sécurité Civile, fire department, private operators, etc.),
- Internal security services (police, customs, coastguard, etc.),
- Private military and security companies,
- Any professional end-user of UAVs.

SURVEY

UAV SHOW 2023 SATISFACTION SURVEY

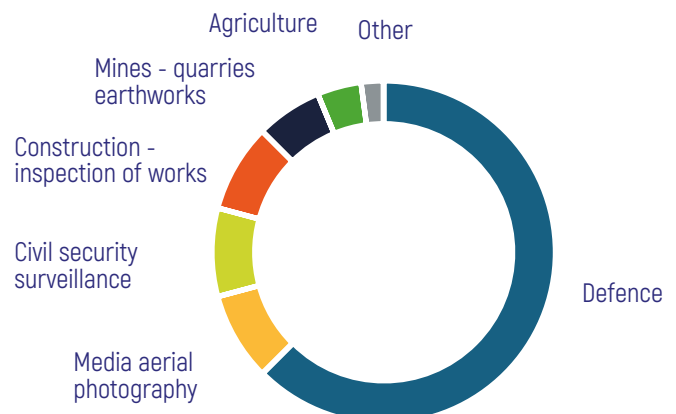

100% of surveyed people are satisfied with their participation.

An average score of attributed to the characteristics and specificities of the show.

7,1/10

92% of surveyed people declare their intention to participate in the UAV SHOW next edition!

ADAPTED OFFERS

- Package booth from 6m² to 24 m²,
- A collective open space of 50 m² dedicated to innovation,
- A collective open space of 50 m² dedicated to test centers,
- Sponsoring formulas adapted to your communication objectives and budgets.

TESTIMONIALS

"The 2023 edition of UAV SHOW was a fantastic showcase for ASMAN TECHNOLOGY's innovative solutions. We had the opportunity to highlight our AERIO offering, dedicated to drone-based services for industry, as well as VIREO, our range of specialized drones for logistics in harsh environments. There were many enriching exchanges, both with the professional community and with potential users interested in our solutions. This show is a real springboard, offering great prospects for partnerships and business opportunities! Many thanks to the organizers. "

Dominique Désveaux, ASMAN TECHNOLOGY

"The UAV Show enables all French players to showcase their dual products and innovations, while meeting to exchange ideas and develop synergies, thus promoting the structuring of the industry. AERIX SYSTEMS has been taking part in this show, which is closely linked to the Bordeaux Technowest technology park, since its creation, with the aim of discovering the future uses of tomorrow's drones."

Aerix Systems

"The UAV show enables us to showcase our latest technological advances, and to make ourselves visible to the French and international drone community (thanks to the presence of foreign delegations). We're also delighted to be able to meet up with all our partners, customers and former students of our training courses: this show is ideal for maintaining your drone network! Last but not least, we're all the more attached to this event as it takes place "at home", and we've participated in every edition since its creation! "

Patrice Rosier, co-founder and co-manager of Reflet du Monde
